# Clinical Pearls Regarding Diagnosing and Prescribing for the African American Population for Healthcare Providers who are Prescribers

Description:

This session will be structured around Case Based Learning — Psychiatric Disorders and Cardiovascular Disease in the African American Patient.

We will begin by reviewing the demographics of Alameda County and Alameda County Mental Health. Then, with three clinical cases, we will closely exam the interplay of hypertension, cardiovascular disease, psychopharmacology, and mood disorders in the African American patient.

*Learning objectives for this session:*

- 1) *The Problem of Misdiagnosis*
- 2) *Differential Diagnostic Considerations*
- 3) *Neuropsychiatric Side Effects of Cardiac Medications*
- 4) *Alterations in Pharmacokinetics in Heart Disease*
- 5) *Psychotropic Medication Use in Heart Disease*
- 6) *Drug-Drug Interactions*
