

Smoking, Vaping & COVID-19: VIRTUAL Brief Intervention Training for Healthcare Teams

Friday October 23rd, 2020, 9am-1pm

Trainer: Samali Lubega, M.D., Medical Consultant & Lead Trainer for the Tobacco Treatment Training Program at LifeLong Medical Care

Description: The coronavirus that causes COVID-19 attacks the lungs and is an especially serious threat to those who smoke tobacco or marijuana, and those who vape. Participants will learn more about the relationship between smoking and complications from exposure to the coronavirus. Participants will learn how to tailor key health messages as it relates to COVID-19 risk to help motivate and support tobacco use quit attempts among high-risk populations.

Who Should Attend: Clinical Staff of substance abuse, mental health and primary care providers, Health Educators, Community Cessation Facilitators, Case Managers, Home Health Care Workers, Nurses and other healthcare providers.

Learning Objectives: at the end of the training, participants will be able to:

1. Share two key messages with patients or clients on how tobacco use can put them at a higher risk of COVID-19 infection and complications.
2. Name at least two treatment options and services that can help with tobacco treatment with clients/patients.
3. Create a quit plan with a client over the course of a 15-20 minute one-on-one counseling session
4. Discuss the tobacco-related risks associated with tobacco use under COVID, and treatment strategies for clients sheltering in place

Registration essential, deadline October 22nd 2020 • Zoom link sent upon registration
