Hosted by:

ACBHCS Quality Assurance Office

Training Description:

Following the release of the DHCS Information Notice 17-040, a Quality Improvement Sub-committee was created. This committee consisted of contractors and county staff across all systems of care and client populations. Several recommendations were made for changes in Clinical Documentation and BHCS protocols.

The changes implemented by BHCS are announced in a Memo to all Providers. These changes will be reviewed in the following scheduled two-hour trainings.

Please have Agency/Clinic Quality Improvement Staff or Managers attend one, two-hour session so that providers are prepared to implement the changes necessary for 3/1/18.
