

# 1/4/2018 ACBHCS SUD Medi-Cal Included Diagnosis List - Alpha by ICD-10 Name

**Instructions:** Crossed out diagnoses are not allowed for ACBHCS DMC claiming. The left column is the complete DHCS DMC Included list attached to MHSUDS IN 16-030. **Providers shall use the ACBHCS list in the right column.** DHCS publishes their list of allowable diagnoses for DMC services in ICD-10 format, this creates several difficulties with regard to providing treatment. 1) ICD-10 provides little if any diagnostic criteria. 2) ICD-10 contains both DSM-IV and DSM-5 substance use diagnoses and this causes issues as there was a change in orientation and philosophy between DSM-IV and DSM-5. 3) Not all diagnoses are in DSM-IV and DSM-5. Alameda County is committed to providing the best possible care to its Medi-Cal recipients and **requires providers to use DSM-5 for all SUD diagnoses.** The ACBHCS list on the right represents the equivalent DSM-5 diagnoses for included ICD-10 codes. When there are multiple possibilities for an allowed DHCS ICD-10 code, all possible DSM-5 diagnoses are listed. Any suggestions are offered as a guide and do not substitute for comprehensive diagnostic formulation. Whenever possible, ICD-10 diagnoses that are also DSM-5 diagnoses should be used (as indicated). Diagnoses are repeated when there are multiple potential cross walked diagnoses or different diagnoses with the same code and indicated by {brackets}.

**Coding DSM-5 Diagnoses:** DSM-5 diagnoses have uncoded specifiers that refine diagnoses. Clients' medical record must include the ICD-10 code, DSM-5 name, and all relevant specifiers. A few specifiers are included below to indicate accurate cross walked diagnoses; however this is not an exhaustive list. When charting SUD diagnoses, "the clinician should use the code that applies to the class of substance but record the name of the specific substance" (DSM-5).

	Not in DSM-5	Crossed-out diagnoses= Not allowed		Cross to this DSM-5 diagnosis
