

# Behavioral Health Department

Alameda County Health

## Welcome, Elizabeth Galli

### Forensic Behavioral Health Clinical Supervisor

---

We are pleased to announce the provisional appointment of Elizabeth Galli to the role of Forensic Behavioral Health Clinical Supervisor, effective March 1, 2026.

In her new leadership role Elizabeth will support AFBH team primarily focusing on ITR (Intake Transfer Release) and EASS (Early Access and Stabilization Services) Programs.

Over the past four years working with AFBH team as a Forensic Behavioral Health Clinician, Elizabeth had the privilege of serving individuals who are incarcerated during some of their most vulnerable times. In this role, she gained extensive experience in forensics and deepened her understanding of the intersection between behavioral health and the justice system. Prior to working for Alameda County, Elizabeth served in roles focused on grief and loss as well as child and family youth services. These experiences strengthened her dedication to compassionate service, collaboration, and advocacy within the community and continue to inform the work she does today.

When not at work, Elizabeth enjoys being on the tennis court or spending time with her daughter — two of her greatest sources of joy, balance, and motivation.

Elizabeth is grateful for the support of her colleagues and leadership and is looking forward to continuing this work in her new role on the AFBH team.

Please join me in welcoming Elizabeth to her new role and congratulating her on her new professional chapter!
