

Tobacco Treatment and the Role of Pharmacotherapy for Behavioral Health Populations

Tuesday, March 11, 2024 11:00AM-12:00PM Pacific Time

Trainer: Dr. Samali Lubega, MD

Description: Providers taking this course will learn more about the scope and dimensions of the tobacco use in behavioral health populations. They will learn different systems-level approaches to increasing the reach of tobacco treatment and how to utilize evidence-based practices in prescribing pharmacotherapy for tobacco use. In addition, providers will learn how to support cognitive behavioral strategies to help patients with pre-cessation, cessation and relapse prevention while developing tobacco treatment plans with patients.

Who Should Attend: AOD Counselors, Mental Health and Primary Care Providers, Health Educators, Community Cessation Facilitators, Case Managers, Home Health Care Workers, Nurses and other healthcare providers.

Learning Objectives – by the end of this training, participants will be able to:

- Describe and apply evidence-based medicine principles to pharmacological treatment for nicotine dependence;
- Be able to explain the anticipated effects of the available pharmacologic treatment in select medical conditions to affected patients; and
- List additional special concerns and issues that affect the choice of pharmacologic treatment as part of a tobacco treatment plan.

Registration required • FREE • Zoom link sent upon registration
