

Behavioral Health Department

Alameda County Health

Welcome, Maricel Magpayo Forensic Behavioral Health Clinical Supervisor

We are pleased to announce the provisional appointment of Maricel 'Mari' Magpayo to the role of Forensic Behavioral Health Clinical Supervisor, effective April 12, 2026.

In her new leadership role, Mari will support the AFBH team primarily focusing on ITR (Intake Transfer Release).

Mari got her degree in Counseling Psychology, emphasizing in Corrections, and has always strongly believed in trauma-informed care. Prior to her career with Alameda County, she also worked within the Katie A program, Foster Care, and Juvenile System in Santa Clara County. She has now been with AFBH for 4.5 years, working with institutionalized individuals impacted by their mental health, specifically those with severe mental illness in the Therapeutic Housing Units (THU's) and ITR. Her time here with AFBH has further reinforced her commitment to treating others with dignity, patience, and kindness, even in challenging and high-pressure situations, and highlighting the importance of mutual respect and collaboration with all interdisciplinary parties to better inform the services provided.

Aside from work, Mari thoroughly enjoys interior designing, spending time with her Family, and watching her little Brother compete at his baseball and soccer games. She finds solace in working out at the gym, and her favorite downtime is sitting on her couch reading a nerdy fantasy fiction novel while eating salty/savory snacks.

Mari feels privileged and a strong sense of appreciation for the resiliency of those she has encountered, learning from her colleagues as well and her own dedication, and for the opportunity to make an impact each day.

Please, join me in welcoming Mari to her new role and congratulating her in her new professional chapter with AFBH!
