## PURPOSE

This policy establishes the requirements for notifying members under age 21 placed in Skilled Nursing Facilities (SNF), Institutions for Mental Disease (IMD), Mental Health Rehabilitation Centers (MHRC), and Short Term Residential Therapeutic Programs (STRTPs) and their guardians of available Early and Periodic Screening, Diagnosis and Treatment (EPSDT) Specialty Services such as: Eating Disorder Services, Intensive Care Coordination (ICC), Intensive Home Based Services (IHBS), Therapeutic Behavioral Services (TBS), and other services in accordance to Specialty Mental Health Services (SMHS) regulations.

## AUTHORITY

- [California Code of Regulations \(CCR\), Title 9, §1810](#)
- [Department of Mental Health Information Notice 08-38](#)
- [Department of Mental Health Letter 01-07](#)
- [Department of Mental Health Letter 04-04](#)
- [Department of Mental Health Letter 04-11](#)

## SCOPE

All Alameda County Behavioral Health Department (ACBHD) County-Operated programs, in addition to entities, individuals, and programs providing mental health and substance use disorder (SUD) services under a contract or subcontract with ACBHD are required to adhere to this policy.

## BACKGROUND

Early and Periodic Screening Diagnostic and Treatment (EPSDT) is a Medi-Cal benefit for individuals under the age of 21 who have full-scope Medi-Cal eligibility. This benefit allows for periodic screenings to determine health care needs. Based upon the identified health care need and diagnosis, treatment services are provided to correct or ameliorate defects and chronic conditions. EPSDT services include all services covered by Medi-Cal. In addition to the regular Medi-Cal benefits, a member under the age of 21 may receive additional medically necessary services.

- **Early:** Assessing and identifying problems early.

- **Periodic:** Checking children's health at periodic, age-appropriate intervals.
- **Screening:** Medi-Cal provides or arranges for screening services for medical, dental, vision, hearing, mental health, substance use disorders, as well as developmental and specialty services. EPSDT covers a broad spectrum of preventative, screening, and treatment services to promote early identification and intervention.
- **Diagnostic:** When a screening indicates the need for further evaluation and follow-up, EPSDT covers diagnostic services. Necessary referrals should be made without delay and with necessary follow-up to ensure a complete diagnostic evaluation is received whenever potential risk is identified.
- **Treatment:** Any necessary health care services to control, correct, or improve health problems discovered by any screening and diagnostic procedures are provided.

### SPECIALTY SERVICES

- **ICC:** ICC is a service that is responsible for facilitating assessment, care planning and coordination of services, including urgent services. ICC requires a designated mental health coordinator whose role is to work within the Child and Family Team (CFT) to ensure that plans from the system partners are integrated to comprehensively address member centered goals and objectives.
- **IHBS:** IHBS are typically delivered within the context of the CFT under ICC. They are individualized strength-based interventions designed to ameliorate mental health conditions that interfere with a youth's functioning.
- **TBS:** TBS are supplemental SMHS covered under the EPSDT benefit. TBS is intended to reduce acute and persistent challenging behaviors that put youth at risk of needing a higher level of care and also assists caregivers in managing and reducing those behaviors by teaching strategies to encourage behaviors that enable the youth to succeed in their current environment.
